DETAILED ACTION

Status of Claims

Claims 1-13 remain for examination wherein claims 3-5 are canceled.

Claim Rejections - 35 USC § 103

The rejections of claim 1-2 and 6-13 under 35 U.S.C. 103(a) as being unpatentable over combined teaching of WO 00/76649 A1 to Lofgren et al. and WO 97/19030 to Tilokavichai et al., further in view of EP 0049777 as generally set forth in the previous office action mailed on 01/24/2008 stands.

The text of those sections of title 35 US Code not included in this action can be found in the prior Office Action.

Response to Amendment

Applicants' amendments to the Claim Rejections - 35 USC § 112 by canceling claim 3 filed on 03/06/2008 are acknowledged. As such, the rejections to the claim 3 set forth in the previous Office Action are withdrawn.

Response to Arguments

Applicant's arguments filed 03/06/2008 have been fully considered but they are not persuasive. Therefore, the grounds of rejection for claims 1-2 and 6-13 as indicated in the first Office Action stand.

Applicants argue that examples disclosed by '777 are silent about coloring fertilizer. The Examiner respectfully submits that '777 disclose that inorganic or organic pigment or both can be used to color fertilizer in the specification (page 2). Furthermore, the Examiner respectfully submits that a reference is good not only for what it teaches but also for what one of ordinary skill might reasonably infer from the teachings. *In re Opprecht* 12 USPQ 2d 1235, 1236 (CAFC 1989); *In re Bode* USPQ 12; *In re Lamberti* 192 USPQ 278; *In re Bozek* 163 USPQ 545, 549 (CCPA 1969); *In re Van Mater* 144 USPQ 421; *In re Jacoby* 135 USPQ 317; *In re LeGrice* 133 USPQ 365; *In re Preda* 159 USPQ 342 (CCPA 1968). In addition, "A reference can be used for all it realistically teaches and is not limited to the disclosure in its preferred embodiments" See *In re Van Marter*, 144 USPQ 421.

Applicant argues that fertilize in EP' 777 is only mentioned once and the pigment is used in different medium. The Examiner respectfully submits that EP' 777 is used to show organic pigment can be used to color fertilizer. Reference ' 030 teaches that using mineral oil, vegetable oil is preferred from an environment point of view (page 2, line 22). The Examiner respectfully submits that a reference is good not only for what it teaches but also for what one of ordinary skill might reasonably infer from the teachings. *In re Opprecht* 12 USPQ 2d 1235, 1236 (CAFC 1989); *In re Bode* USPQ 12; *In re Lamberti* 192 USPQ 278; *In re Bozek* 163 USPQ 545, 549 (CCPA 1969); *In re Van Mater* 144 USPQ 421; *In re Jacoby* 135 USPQ 317; *In re LeGrice* 133 USPQ 365; *In re Preda* 159 USPQ 342 (CCPA 1968). In addition, "A reference can be used for all it

realistically teaches and is not limited to the disclosure in its preferred embodiments"

See *In re Van Marter*, 144 USPQ 421.

Applicant argues that Examiner did not address applicant's argument in the previous office action. The Examiner does not agree. Applicant continues to argue that the combined teaching of '649 and '030 disclose using inorganic pigment to color fertilize. The Examiner pointed out that combined teaching of Lofgren et al. and Tilokavichai et al. was used alone at the time the applicant did not amend the claims, which recited using inorganic pigment to color fertilizer. EP 0049777 is cited in the previous office action to show that inorganic pigment or organic pigment or mixture can be used to coloring fertilizer. In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).
